## Introduction

If you are like most people who have chronic Lyme disease, the relief of being diagnosed with a real infection may be the end of a long journey.

For some, it is years of misdiagnoses and lengthy treatments for diseases like MS, Fibromyalgia, Mental illness and even Lou Gehrig's disease . You follow the doctor's orders diligently and suffer months, even years of frustration wondering why the treatment isn't working.

The initial diagnosing doctor may shrug his shoulders and say that you will have to learn to live with that particular quality of life (depending on your symptoms) or he/she may refer you to another doctor to hunt for a different diagnosis.

The worst experience in the early months (or years) of searching is when your doctor sends you to a psychiatrist. That is not a feeling anyone wants to live through. It has you wondering about your own sanity, and adds immeasurable suffering to the emotional frailty you feel as the Lyme spirochetes attack your central nervous system and cause your emotions to explode with fear, anger, sorrow and or anxiety.

“Am I losing my mind?”

It would appear that the answer is “Yes” based upon how you feel, AND when your doctor sends you to a psychiatrist.

---

For others like me, it is sheer luck to get a diagnosis within six months of my first “crash” of symptoms, but I assure you that the same questions ran through my mind as test after test came back “normal”.

How could I be even close to normal when my symptoms required every window in the house to be darkened, the requirement for complete silence kept me from music, which was once a great joy in my life. Even footsteps across the floor created agonizing pain.

I was lucky to have a doctor who had a history of the many annual physicals showed a healthy vibrant mother and equestrian (in spite of aches and pains that would come and go.) to compare to the completely disabled woman I became over the course of several weeks. He never doubted my sanity and made sure that each doctor he sent me to would be supportive.

Over these last few years of disability, I have met hundreds of Lyme victims with stories that include a vast array of symptoms ranging from minor to severe – each with a unique journey that led them through a wide range of “medical specialists” – some are horror stories and some are just sad, but the relief of having a definitive diagnosis after months and years of searching will always result in a sense of relief.

But that is just the beginning.

Chronic Lyme is a relentless battle with very few knowledgeable licensed medical practitioners to choose from, an uneducated community which is unable to give support

like they would, say, for cancer – and symptoms that constantly cause us to doubt ourselves.

Perhaps one of the worse symptoms with chronic Lyme disease is depression, because as time moves on and friends and family move on with their life, it is impossible for anyone (except perhaps a very supportive spouse or parent who is with you each day) to understand the mourning that accompanies chronic illness...mourning for a past life that seems impossible to retrieve.

In my quest to find a cure for a deeply chronic case of neuro-Lyme with many co-infections, I have tried many protocols, and continue to search for protocols based upon new research.

When I first heard about “Rife Machines”, I thought it was the “Holy Grail”. Here, finally, a cure for Lyme.

It all made sense. Antibiotics were driving the bacteria into hiding, and even causing the bacteria to morph into a different form.

If sound can be used to destroy kidney stones, and to shatter glass, why couldn't it be used to explode spirochetes in every form, and in every hiding place?

## Chapter One – The History of Dr. Royal Rife

Dr. Royal R. Rife, a brilliant but controversial scientist living in the first half of the twentieth century was committed to discovering a method to destroy bacteria and other harmful pathogens using high frequencies.

Similar to the phenomena of shattering glass at a certain frequency or “pitch”, the doctor worked tirelessly throughout his career to apply this approach as a cure for cancer amongst other deadly diseases.

Rife is said to have built his first microscope in 1921 and later, after much research and work on microscope optics and light sources. He patented a high-intensity lamp for microscope use in 1929 (Patent #1727618).

In tests using *B. coli* (bacillus coli) Rife found that the bacteria, if exposed to radio-frequency energy at certain frequencies, would "deactivate", or die. Later testing showed the same results with other samples of *B. Coli* at the same frequencies.

Rife needed a means of seeing even smaller pathogens, even down to the virus size if possible, and set out to examine microscope optics and the factors which limit the standard optical microscope to magnifications of between 1000 and 1500 times magnification.

Rife found a means to building a microscope with a very long optical path with specially-ground quartz prisms in the barrel of his microscope. In addition, he

## Lyme Combat VII – GB4000 Frequency Generator

---

determined that white light, which contains all wavelengths of visible light, was not suitable for high-magnification optics, and used a "Risley" prism between his light source and the sample, thus illuminating the sample with a single frequency of monochromatic light (very similar to high-definition research microscopes of today which use lasers).

By the mid-1930's Dr. Rife, had successfully found and documented the frequencies which would devitalize many of the major illnesses of the day, and had built a "ray machine" which used a helium plasma lamp excited by very precise radio-frequencies. A short exposure once every three days was the treatment method which seemed to work best, and there are many letters from MDs and patients who had used Rife's "Ray Machine".

The medical establishment was not interested, even though there were a few MDs around the US who eventually used his ray machine quite successfully against many different illnesses.

There were not very many of the machines in existence, perhaps four to six, and being a new technology, they were expensive and difficult to build. Rife's focus was in determining the exact frequencies which would devitalize various pathogens - he was at heart an exacting machinist.

Tragically his work was maligned by the medical powers of his day and much of his work was destroyed, however, there are many engineers today that believe in the same

## Lyme Combat VII – GB4000 Frequency Generator

---

premise and have built machines for people to use in their homes to treat themselves at regular intervals.

There are many machines on the market today although the FDA has ordered serious fines for making claims of cures for any disease or illness. But this has not stopped people from buying the machines and treating themselves. I will address the GB4000 and the Coil machine.

**See Appendix E for more of Dr. Rife's history or [here](#).**

**See Appendix F for a list of frequencies which apparently destroy various illnesses listed alphabetically.**

## Chapter Two – Frequency Generator

Frequency generators work on the principle of sympathetic resonance, which states that if there are two similar objects and one of them is vibrating, the other will begin to vibrate as well, even if they are not touching.

In the same way that a sound wave can induce resonance in a crystal glass and ultra-sound can be used to break up kidney stones, it is believed that a frequency generator uses sympathetic resonance to physically vibrate offending bacteria, viruses and parasites, resulting in their destruction and elimination from the body.

Dr. Raymond Royal Rife, as covered in the previous chapter, is the man who uncovered this amazing phenomenon. He used light to see these invaders while applying sound in the radio frequency range to create a sympathetic resonance of the bacteria or virus until it either exploded or morphed into a healthy cell.

The question always arises about the type of signal that Rife used, and which one is better. The most effective of these frequency generating devices will deliver an analog signal (versus a digital signal).

Analog is better because it is in many ways a "more natural" frequency. It includes the sub-tones and overtones to the base number, providing a maximized fullness, essentially a richness of tonal qualities. A very big part of that is what is called the harmonics. An audiophile understands this. Those who desire only "true" sound on their

## Lyme Combat VII – GB4000 Frequency Generator

---

stereo systems insist on analog devices for just this reason.

### **The Analog vs. Digital Debate**

The current analog vs. digital discussion is wrought with misconceptions and disinformation. Such as, digitally generated frequencies do not vary, which implies that they do not have overtones and undertones.

This would only be true if the frequencies remained digital. That is why digital frequencies from DDS (Direct Digital Synthesis) and DSP (Digital Signal Processing) are converted to analog before they are put out of quality generators.

The analog frequency produced by a digital chip can be swept up or down with more accuracy than any old tube analog instrument. The most important thing to remember is the frequency has to be converted to analog before it is output from the frequency generator.

### **Why Power Output Is Important In A Frequency Generator.**

When comparing various instruments, power output is a very important consideration.

[I recommend the GB4000 Frequency Generator.](#) It has a very wide frequency range which goes up to 20,000,000 Hz and boasts a 2.4 MHz carrier wave for carrying lower frequencies on a higher Radio Frequency wave.

## Lyme Combat VII – GB4000 Frequency Generator

---

This generator is perfect platform for a diverse array of frequency generating applications, precision quartz controlled oscillators and other unique features.

The RF amplifier boosts the power level up to 10 Watts in the range of 1-20 MHz. This generator is easy to use but also has advanced features appropriate for the intermediate and expert alternative energy researcher.

The GB-4000 is the only frequency generator available that is capable of running 8 frequencies simultaneously.

- Frequency range of 0.1 to 20 million hertz.
- Produces digitally accurate frequencies converted to analog for full analog harmonics.
- Incorporates a 2.4 MHz RF (Radio Frequency) carrier wave technology.
- Carrier wave can be turned off so user can use it as a standard low audio frequency generator.
- Produces square wave harmonics..
- Displays all frequencies on the LCD - not hidden program numbers like other frequency generators.
- Allows you to program your own frequencies and groups of frequencies (2000 custom channels available, each channels stores up to 48 frequencies).
- Computer programmable software included.
- Runs either single or multiple frequencies (up to 8 frequencies simultaneously).
- Capable of running a 90% duty cycle (almost double the power of other instruments; other frequency generators typically can only run a 50% duty cycle).
- Incorporates gating capabilities from 5 - 2500 Hz with a 10 - 90% duty cycle.
- Capable of running both sine wave and square wave waveforms.
- Channel sweep capabilities in all 2000 channels.
- Capable of running both narrow and broad range sweeps.
- Capable of running converge sweeps to 20 million hertz.
- Offers 4 outputs (other frequency generators have only 2 outputs).
- 9 times more powerful than any audio frequency generator.

## Chapter Three – Coil Machine

A “Coil Machine” emits a large magnetic frequency field to destroy bacteria.

In case you are not familiar with Doug coil machines, they were invented in the late 1980s by Doug MacLean, an engineer in Seattle who was struggling with Lyme.

After reading about the possibility of killing bacteria with frequencies, Doug decided to construct the most powerful frequency-inducing machine he could conceive of.

The result was a machine quite different from any previous “Rife” machines in that the mechanism for the delivery of frequencies was via a large magnetic coil. The coil of a Doug machine produces an extremely powerful magnetic field, which directly penetrates any tissue placed within that field.

It targets one frequency at a time and is capable of producing alternating magnetic fields with frequencies ranging from approximately 20 Hertz to 2200 Hertz.

### **Output of contact (or "pad") type instrument vs. output of the RAY TUBE?**

Contact or "pad" type instruments deliver frequencies through direct contact, while ray tube instruments transmit frequencies indirectly through the air. Direct contact makes it possible to get the full energy into the body without power loss. Indirect contact though a ray tube is very efficient as long as you keep the ray tube within several inches of the body.

## Lyme Combat VII – GB4000 Frequency Generator

---

The laws of physics in regards to signal loss come into play when using a ray tube. It requires much more power at the frequencies to deliver its output. For every foot that you move the ray tube away from the body you have to divide the power output by the ray tube by a factor of 4. If you have 50 watts (power level used by Dr. Rife's 1934 instrument) of power coming out of a ray tube then at one foot away from the ray tube you only have 12.5 watts. At two feet you only have 3.125 watts and at 3 feet you only have about .78 of a watt.

Because of this loss Dr. Rife had the doctors who used the instruments stay within 6 to 12 inches of the body with the ray tube. Today many ray tube instruments output about 100 watts or more. Their manufacturers recommend those who use them to stay at least 3 feet away from the ray tube. At one foot away from the ray tube you only have 25 watts. At two feet you only have 6.25 watts and at 3 feet you only have about 1.56 of a watt.

With a direct contact instrument this power loss is not a problem; therefore, one does not need to use anywhere near the same power levels used by a ray tube instrument. This is the benefit of a contact instrument.

### **Background of the contact or pad instrument.**

The first contact instrument was built in 1957 by John Crane and John Marsh. The ray tube instruments were very expensive to build and they wanted to build smaller instruments that would be less expensive. Even today many ray tube instruments are

## Lyme Combat VII – GB4000 Frequency Generator

---

three times more expensive than pad instruments. John Crane and John Marsh took an off-the-shelf frequency generator and hooked up pads to it.

These first pad instruments worked quite well but were underpowered like most of the pad instruments built today. They tried to overcome the power problem with larger pads. Because the off-the-shelf generator didn't have a carrier frequency they no longer used one. This was important. Without the RF carrier frequency, they couldn't get the same results as the ray tube instrument. Doug's Coil machine uses one of Dr. Rife's primary RF carrier waves.

So you can see why the coil machine requires a mechanism to deliver the frequencies through the body using "contact" or "pad" type instruments. Direct contact makes it possible to get the full energy into the body without power loss. Indirect contact though a ray tube is very efficient as long as you keep the ray tube within several inches of the body.

They tried to overcome the power problem with larger pads. Because the off-the-shelf generator didn't have a carrier frequency they no longer used one. This was important. Without the RF carrier frequency, they couldn't get the same results as the ray tube instrument.

## Chapter Four – Summary of Differences

When comparing the various instruments power output is a very important consideration. This is the reason the GB-4000 uses a carrier frequency so that more power can be output.

The power output of most frequency generators on the market today that do not use an RF carrier frequency is only about 0.20 of 1 watt. The GB-4000 with the use of an RF carrier is about 2 watts and is over 9 times more powerful than these instruments. With the use of the optional SR-4 amplifier it is over 50 times more powerful.

Digitally produced frequencies converted to analog are far superior to any signal that comes from an old antique tube type analog frequency generator.

Antique tube type generators are very limited. If I want a frequency of 2128.5, an old tube analog generator would not be accurate enough to give me that frequency to use. It could only give me 2128.

Also digitally converted frequencies allow me to sweep with far more accuracy than old analog tube type instruments. Even a thousandth or millionth of a frequency is possible even though this kind of accuracy is not needed.

This is something that a purely analog instrument could not do as accurately. Digitally produced frequencies when converted to analog can accurately produce

## Lyme Combat VII – GB4000 Frequency Generator

---

minute details. These analog frequencies when converted to a square wave waveform produce square wave harmonics. A Coil Machine requires a mechanism to deliver the frequencies through the body using “contact” or “pad” type instruments while ray tube instruments transmit frequencies indirectly through the air.

### **Summary:**

1. Coil machines produce only one frequency at a time. Switching frequencies involves a manual procedure which includes resetting a bank of capacitor switches. This can be challenging for those suffering from Lyme “fog”.
2. The magnetic field produced by the coil is not large. You must gradually move your body parts through the field; the coil is heavy and cannot be waved around the body.
3. Failure to follow proper operational procedures can damage or destroy the expensive machine. Proper procedures for a coil machine are significantly more involved than for a frequency generator.
4. The Coil Machine requires direct contact whereas the GB4000 emits the frequencies through the air and can be programmed to sweep through numerous frequencies rather than one at a time.
5. Typically the coil machine is far less expensive but with amplifiers and other accessories, the coil machine is about the same cost.

For pricing and more information see [Doug’s Coil Machine](#), and [GB4000](#).

### 6. Chapter Five – The Jury Is Still Out

There are many people who credit their recovery to “Rife-like” machines, however, when pressed, the recovery is usually given in a percent range. Even the greatest proponents of these machines will only claim 95% - 98% and manage the residual disease with further treatments, diet, detox and lifestyle changes.

For people who are unable to take antibiotics or multiple supplements, a frequency generator could be a great method to use.

I have great reservations about relying on a technology that focuses on a particular frequency because we know that *Borrelia burgdorferi* morphs immediately into a unique bacteria form to hide from the immune system. When one considers the many hundreds of thousands of mutations combined with the thousands of variants in the genetic code of the bacteria, a frequency sweep would be more likely to actually “hit” the specific disease and/or combination of tick-borne diseases, but not with any real certainty.

When evaluating any protocol to fight Lyme disease there is an element of hope and determination that cannot be measured, but must be considered.

Never, ever give up hope. No matter how sick you and I are today, we have the hope of a new day and better health.

### Appendix A - The Jarisch-Herxheimer Reaction

A Jarisch-Herxheimer reaction or “herx” as it is commonly called is a predictable and temporary “flare-up” or worsening of symptoms caused by the die-off of certain bacteria.

This condition was discovered and named after the German dermatologist, Karl Herxheimer (1844-1947), and originally observed in syphilis patients.

Although both Lyme disease and Syphilis come from Spirochete bacteria, their structure is quite different.

Dorlands Medical Dictionary refers to the Herxheimer reaction as *a transient, short-term, immunological reaction commonly seen following antibiotic treatment of early and later stage [infectious] diseases which [may be] manifested by fever, chills, headache, myalgias (muscle pain), and exacerbations of cutaneous lesions. The reaction has been attributed to liberation of endotoxins-like substances or of antigens (a substance which causes an immune reaction) from the killed or dying micro-organisms.*

Unlike Syphilis, Lyme causes multiple Herxheimer reactions, and can be physically and emotionally devastating.

Some have a reaction within days of effective treatment; while for others, it may take longer. Generally, the longer it takes for a reaction to occur after beginning treatment, the more disseminated the disease is.

## Lyme Combat VII – GB4000 Frequency Generator

---

These brutal flare-ups can last between two days and two weeks, but there are some who report much longer reactions when treating their disease aggressively (some will try several therapies at the same time with the hope of attacking the disease more effectively).

“You have to get worse, before you can get better!” is a grim consolatory phrase passed back and forth in chat rooms and community forums amongst sufferers on the internet.

But the roller-coaster of pain often threatens recovering patients to greater relapse, as we grasp for the energy to deal with both physical and emotional symptoms.

“It’s just so hard to deal with worsening symptoms after months or years of illness.” complains one long-time Lyme patient.

The good news is that science clearly shows “herxing” means that treatment is working. The dying spirochetes emit a neurotoxin that floods the body from every active location, and over-stimulate the already weakened immune system. So in general, the greater the bacteria-load, the greater the reaction will be.

Many Lyme-literate doctors recommend [“Smilax”](#), an herb that effectively binds the neurotoxins, and passes them out of the body. Epsom salt baths are also soothing; although very hot baths will also aggravate symptoms, as the spirochetes are threatened by heat.

## Appendix B –Detoxification

Lyme-literate doctors agree that killing infectious bacteria is but one part of the process of healing from Lyme disease (and co-infections). Detoxification is equally important to rid the body of parasites and other elements in our bodies that harbor the disease.

Detoxification can also be tricky depending on each person's disease, immune system, allergies and many other contributing factors.

Mercury poisoning is a growing health problem that interferes with the evaluation and treatment of Lyme. The best way to rid the body of heavy metals is regular use of the FAR Infrared sauna, but there are some other products that greatly help.

Here is a list of the very best products I have found to help your body detoxify:

- [Heavy metal detox](#)
- [Far infrared sauna](#)
- [Liver detox](#)
- [Smilax](#)
- [Detox foot patches](#)
- [Dental detox](#)
- [Parasite detox](#)
- [Chemical detox](#)
- [Psyllium cleanse blend](#)

## Lyme Combat VII – GB4000 Frequency Generator

---

- [Intestinal nano detox](#)
- [Xeno detox](#)

Remember, our bodies have a wonderful detoxification system built in, so drink lots of spring water, distilled water or ionized water to help move waste out of your body.

For more in depth information see [Combat Book IX – Detox.](#)

Investing in a water purifier and ionizer would ensure the crucial purity needed in the vast amounts of water that are required to properly hydrate your body. Ionizing and oxygenating the water adds a combat component very simply – Lyme and many other diseases, viruses and parasites cannot tolerate oxygen.

## Appendix B –Pure Water

Unlike food which can be washed but never purified; or eaten with minerals and vitamins but never reconstituted with the vitamins and minerals Nature intended food to supply our bodies with, water can be purified and energized.

However, the very best treatment for water is the Tyent MMP 9090 “Turbo Extreme” which purifies and ionizes each drop of water you and your family use. No more large weekly bills for bottled water. You can rest knowing you are giving yourself and your family the number one health promoting “product” for recovery from Lyme and to help your immune system fight off disease in the future.

I like the water ionizers made by [Tyent Water Ionizer](#) because of the company’s commitment to the highest quality machines. The company is not just run by businessmen, but by doctors who are continually studying the best way to deliver the highest energy water, and hence, the water with the most healing benefits.

[Tyent Water Ionizer](#) has the ability to turn ordinary tap water (guilty of causing if not contributing to the three most probable causes of sickness, chronic

## Lyme Combat VII – GB4000 Frequency Generator

---

disease and premature aging; (1) high acidity levels in the body, technically called acidosis, (2) damaging runaway free radical activity and (3) body dehydration.)

[Tyent Water Ionizer](#) counters high body acidity is caused primarily by the foods we eat and the beverages we drink. Ideally our diet should be 80% alkaline and 20% acidic. In reality the American diet is just the opposite.

When our body pH is lowered (towards acidic) ALL major bodily functions are negatively affected. High acid intake results in the creation of excess acidic waste.

So by [Tyent Water Ionizer](#) will protect our kidneys and liver (our chief detoxification organs from acidic overload.)

Alkaline ionized water contains huge numbers of OH negative ions, molecules that have an extra electron, making alkaline ionized water a VERY POWERFUL antioxidant. As a side benefit, the interaction between OH negative ions and free radicals produces Oxygen providing the body with LOTS of NATURAL energy!

Alkaline ionized water is restructured making it up to six times more hydrating than ordinary water. Smaller water clusters more effectively penetrate cells

## Lyme Combat VII – GB4000 Frequency Generator

---

resulting in much more efficient delivery of nutrients and oxygen to cells and removal of waste material and toxins from cells.

Alkaline ionized water actually enables the body to heal itself and to keep itself healthy and free of sickness and disease, what it was designed to do.

Alkaline ionized water is very similar in nature to the famous miracle water of Lourdes France, considered by many to be the fountain of youth.

## Appendix D – History of Royal R. Rife, Jr.

May 16, 1888 - August 5, 1971

Courtesy of Dave at [dfe.net](http://dfe.net)

This is a history of the life of Royal Raymond Rife, Jr.. Not much is known of his early life, other than he was born in Elkhorn, Nebraska, on May 16, 1888, and was the second child born to Royal Raymond Rife and Ida May Rife. His father was a mechanical engineer. Royal Rife's heavy German accent may be an indication that their household spoke German as their home language. (Elkhorn's web site indicates that their area's ancestry is 47% German.)

Rife indicates that he started his first laboratory in San Diego in 1912, after working in New York for four or five years (apparently for the Carl Zeiss firm). He appears to have then gone to Germany where he worked with Carl Zeiss, of the Zeiss optical company (a major manufacturer of microscopes and other precision optics) in Heidelberg, Germany.) In a history of his career later, indications are that he was also a US Naval Commander, Retired, and there were suggestions that he may have been on assignment for the US Government while in Europe.

In 1912, he married Mamie Quinn in the San Diego area. There are reports that he traveled extensively in Europe, accompanied by his wife, probably in the late 1910's or following WWI in the 20's.. Rife was an accomplished musician, playing the French horn and the guitar; one letter indicates he built a 100-string "guitar"-type-instrument. He was also quite a sportsman, with a collection of high-powered rifles, and held the high-powered motorboat speed record until his

## Lyme Combat VII – GB4000 Frequency Generator

---

death in 1971. Photos of him with musical instruments (and on one of the power boats) are available from some web sites.

In a brief history of Rife written in 1954 by John Crane, Rife indicated that he received an honorary Doctor of Parasitology (Science) degree from the University of Heidelberg in 1914. Crane further says that Rife received an honorary Doctor of Science degree from the University of Southern California in 1936, although paperwork in the 30's indicated that Rife may have never accepted the degree from USC, indeed, Rife was known, in those years, to throw mail into the trash unopened.

Rife is said to have built his first microscope in 1921 and later, after much research and work on microscope optics and light sources. He patented a high-intensity lamp for microscope use in 1929 (Patent #1727618).

In tests using B. coli (bacillus coli) Rife found that the bacteria, if exposed to radio-frequency energy at certain frequencies, would "deactivate", or die. Later testing showed the same results with other samples of B. Coli at the same frequencies. Rife needed a means of seeing even smaller pathogens, even down to the virus size if possible, and set out to examine microscope optics and the factors which limit the standard optical microscope to magnifications of between 1000 and 1500 times magnification - the "Fraunhofer Diffraction Limit".

Rife found a means to building a microscope with a very long optical path with specially-ground quartz prisms in the barrel of his microscope. In addition, he determined that white light, which contains all wavelengths of visible light, was not suitable for high-magnification optics, and used a "Risley" prism between his light source and the sample, thus illuminating the sample

## Lyme Combat VII – GB4000 Frequency Generator

---

with a single frequency of monochromatic light (very similar to high-definition research microscopes of today which use lasers).

Rife built his first known microscope, "Number 1" in 1920 on an optical bench similar to a lathe bed. Microscope #2 was similar in construction, but built in 1923 in a vertical format similar to a standard microscope. #2 was sent to Northwestern University for Dr. Arthur Kendall's use, apparently for some time in the 1932 time-frame. Unit #3, built in 1933 and shown above on the right, was the "Universal Microscope" which had provisions for polarized, bright field, dark field, infrared and ultraviolet imaging. #3 was the unit which is talked about so much, since it is the unit which Rife used to examine live virus samples. Microscope #4, which had no polarizing stage, but offered magnifications up to 15,000 times, was built in 1935, and appears to have been a much simpler Universal Microscope. Rife hoped to find a manufacturer for this simpler machine.

Rife commented in one of his letters that #4 had been built at the request of a manufacturer, but he does not say who that might have been. In papers from England in the 1938 period, it is mentioned that #4 had been sent to England, and a technician working for Rife went there to help install it. Later it is mentioned that #4 was sent back to Rife (in 1939), and at some point a newer #5 microscope is sent. #5, built about 1938, is currently in the Science Museum in London, England, and while it is not available for normal viewing, groups of researchers have been able to closely examine it, and a videotape of it was made in 1999.

The Electric Club of San Diego thanked Rife for a presentation he gave them in February of 1930. There are many similar letters in the records; Rife was a popular, fascinating and entertaining speaker!

## Lyme Combat VII – GB4000 Frequency Generator

---

In the early 1930's Rife became associated with [Milbank Johnson](#), M.D., who, in earlier years, had been Professor of Physiology and Clinical Medicine at the University of Southern California (USC), and was the Chairman of the "Special Medical Research Committee". USC has no record of such an organization; however there are numerous documents from Johnson and others referring to the Committee. It is quite possible that this Committee was a "gentlemen's handshake" agreement between Dr. Johnson and Dr. Rufus B. von KleinSmid, President of USC.. In addition, quite a number of researchers at USC are named over the years, so there is no doubt that this group did exist in some format. Dr. Johnson had come to California in 1893 to start up the Alhambra (CA) hospital. He was a member of the American Medical Association, the Los Angeles and the Southern California Medical Associations, and was a founder and the 2nd President of the Automobile Club of Southern California from 1903 to 1905. He was a Director of the Pacific Mutual Insurance Company from 1906 to 1933.

Dr. Johnson was a driving force behind the development of the Rife machine. He, and many others involved in the research of the Rife machine, were nationally-known and recognized in their fields, and there is no doubt whatever that the microscope and "ray machine" did in fact work.

Several of the medical researchers and doctors of that time who were involved with the research of devitalizing organisms were the top people in their field; the head of Experimental Bacteriology at Mayo Clinic; the Director of Medical Research at Northwestern University, and others.

In 1931 Dr. Johnson was contacted by, and encouraged [Dr. Arthur Kendall](#), Ph.D., Director of Medical Research of Northwestern University (and eventually Dean of the Medical School) near Chicago, to come to California and meet Royal Rife. The two got along well, using

## Lyme Combat VII – GB4000 Frequency Generator

---

Kendall's "K" Medium (developed from pig tissue) to grow human cancer cells for experimentation with Rife's "ray machine" or frequency instrument.

In May 1932 Dr. Johnson wrote to Dr. Kendall (at one time Director of the Hygienic Laboratory in the Panama Canal construction project) (The national Hygienic Laboratory eventually became the National Institutes of Health). Kendall, certainly an internationally-known Ph.D., had been awarded a Doctor of Science degree by USC in 1932. (Kendall retired from Northwestern University in 1942 at about age 65, and moved to a housing development he had been actively supporting in Mexico, and passed away in late 1959 in the San Diego area, after the development project failed.)

It is not certain, but conjectured that in about 1933, Dr. Johnson suggested a radio engineer named Philip Hoyland, who lived in nearby Altadena, CA., to Rife as someone who could help (or even build) the ray tube devices. [Hoyland](#), who was known as quite an accomplished radio engineer of the time, built Rife's equipment in his Altadena home or garage, and delivered the machines to Rife's laboratory in his truck.

Hoyland, who was married to Laura Mazie, moved to the Pasadena area in 1927, and was the President and Manager of the Premier Radio Corporation of California. In 1928 he is shown as a salesman for the Rowley Electric Company, and 1929 and 1930 as a serviceman for the Radio Doc Company in Pasadena. He owned his home at 584 Stonehurst Drive in Altadena. There is evidence that Hoyland built most, if not all, of the early Rife Ray machines, and court documents show him as the owner, along with Rife, of the Rife Ray Machine.

In April of 1934 Dr. Milbank Johnson of Pasadena, CA., wrote to Arthur Kendall about the clinic proposed in La Jolla, Ca., starting the middle of June, and indicates that he has rented a

house there for three months - so as to be close to the clinic which was held from June to August/September at the "Annex" on the Scripps Ranch. He further states that "I hope by then we will have human cases to work on."

There were a number of patients at the clinic, including some cancer patients. Johnson later wrote that he "had no help whatsoever, no nurses or assistants". In another letter in 1935, he says that the results were "not conclusive" - it is thought that some patients had responded well to the treatments from the Rife Ray machine, but that Johnson was not convinced that such a speedy recovery was necessarily the same thing as a "cure" - although apparently Royal Rife considered them "cured."

Dr. Johnson also wrote later that he had run the clinic by himself, to prove what the Rife Ray machine could do in vitro - in the body. Mr. Rife was almost certainly not present for most of this clinic, but may have come around occasionally to help or to observe - he later testified in court that he had never treated a human patient.

One patient from that clinic, who was described as one of the few patients with a visible cancer (on his cheek) contacted Dr. Johnson in early 1935, and was sent to another MD for removal of one eye - there is evidence that he had an eye cancer which had either not gone away, or which had returned. It is certain that Johnson sent him off for removal of the eye.

Dr. George Dock, who was the President of the Las Encinas Sanitarium in Pasadena, was also the President of the Los Angeles County Medical Association, and is mentioned as one of the physicians "attending" or more likely advising, in several of the letters of the period. It is quite possible that none of these other MDs actually participated in the Clinic, and in one case, Dr. Alvin Foord later testified that he only did tests on samples sent him by Dr. Johnson. Johnson was an avid writer, yet there are very few letters from the period of the clinic and through into 1935 from him. I believe that, had he been satisfied with the results of the La Jolla

## Lyme Combat VII – GB4000 Frequency Generator

---

Clinic, he would have been writing to many of his friends about the results - those letters have never been found, placing the results of the clinic in grave doubt.

On May 15th, 1935, Dr. Johnson wrote to Rife indicating that the University of Southern California was sending Rife notification that he was to be given a Doctor of Science degree (honorary). There are indications that Rife never wrote back to USC, indeed, Dr. Johnson chides Rife as being "a rotten correspondent" in his letter to Rife. Also in 1935, Rife received an order for "One of those hypersensitive stethoscopes", indication that Rife was indeed building other devices for researchers and MDs.

In a letter in 1939, he was requested to bring "the stethoscopes .. and other of your inventions" that he might care to put on the market to England (that trip never happened, as Rife was summoned to testify at the Beam Ray trial). Dr. Johnson began using one of the Ray Machines (probably #5 or #6) in the fall of 1935, the year after the clinics in La Jolla, installing the device at the Santa Fe Hospital in Los Angeles. Treatments were offered twice a week, typically for five minutes each, and apparently focused on individual diseases.

Dr. Milbank Johnson, in 1936, writes that he is happy that Phil (Hoyland) was able to tell what the matter was with one of Rife's Ray Machines, and that it would be no problem to fix.

Other documents of the period indicate that Rife usually had at least one of the machines that Phil Hoyland built, and that the two men sometimes traded machines while one was being worked on. In April of that year, a Dr. Goodman writes to Johnson about a patient of his whose vision had improved following treatments. A later letter to Rife from Johnson indicated that this patient had seven three-minute treatments with the Ray Machine.)

## Lyme Combat VII – GB4000 Frequency Generator

It became clear that Rife needed a better facility in which to do his work, and Milbank Johnson approached Henry Timken regarding funds for a new lab - Johnson's letters indicate that Timken was not in favor of additional spending, but Johnson, with help from Mrs. Bridges, overcame Timken's concerns.

It appears that Rife's new laboratory was started in construction in April 1936, and in August of 1936 Rife moved into the facility - certainly the laboratory seen in the film (now on videotape) narrated by John Crane. He expresses great satisfaction in the new facility, built from the ground up to his specifications, with considerable advise from Dr. Johnson (one of these suggestions was to place the restrooms near the entrance, so that guests didn't have to tromp through the laboratory to use the facilities), and placing the animal rooms in the basement along with the heavier equipment.

In October-November of 1936, Dr. Johnson started using a Ray Machine in a clinic at the Pasadena Home for the Aged, and reported having excellent results, doing exposures three times a week. In that letter, he also tells of finding a "new" band of frequencies using a modified machine, and that band not only broke all the glass in his laboratory, but it also killed every culture sample - including molds - that were in the lab.

Johnson was quite excited about this, in his letter to Rife. A later letter tells of treating twenty to twenty-two people per session at his Clinic in Pasadena, and having excellent results. When Johnson closed this clinic, it appears that he was writing up the results for publication - one note says that all but one patient with cataracts was restored to normal vision - but it is unknown if that publication ever happened.

In 1936, historical documents indicate that Rife was referred to as "Commander Rife" - and there are several cases of cataracts and carcinoma which patients recovered from following exposures to the ray tube. Coincidentally, Rife by this time had been ordered to spend no more than 2 hours a day at the Universal Microscope, as his eyes were failing; the long hours (days actually) of working at the microscope non-stop was taking its toll. One of the lamps Rife used was a small mercury-vapor light which produced quite a lot of ultraviolet light; since Rife was using quartz optics, that UV may have contributed to his failing eyesight.

The Beam Ray Company apparently was formed in October of 1936, with the approval of Rife and Hoyland. It is not known exactly what Rife's involvement with Beam Ray was, although it is very clear he was concerned that the machines produced be fully tested and certified as to their "true devitalizing power".

On June 1st, 1937, the corporation amended its By-Laws to increase its Board. The Beam Ray Corporation officers consisted of: Benjamin Cullen (President), Ray Williams (Vice-President), Beth Willman (Secretary), Philip Hoyland, Charles Winter, J. W. C. Kitchen, A. B. Weeks, George Edwards, Ray Reynolds, and John Ernsting. (Note that there is no relationship to the Beam Ray Corporation now operating).

In early 1938, Benjamin Cullen transferred 450 shares of stock in Beam Ray to Royal Rife, 140 to Philip Hoyland, 480 to Edith Henderson, and 380 to W. H. Van Wart, while retaining 600 shares. A. W. Olmstead transferred 53 shares to Charles Winter and 447 to Beth Willman, while retaining 100 shares, and C. R. Hutchinson transferred 250 shares to C. W. Ernsting, 50 to George Edwards, 50 to Ray Reynolds, 200 to Royal Rife, 610 to Philip Hoyland, 100 to R. O. Berthean, 300 to Beth Willman, 300 to W. V. Blewett, 20 to W. H. Van Wart, 20 to Edith Henderson, and 447 to Charles Winter, while retaining 700 shares.

In 1937, Dr. Johnson indicates that Rife was working with helium and argon ray tubes. It appears that earlier versions had been helium, which may be such a small molecule that keeping it inside even a glass tube is difficult.

Several papers mention that tubes had to be sent back to Rife or to Beam Ray to be recharged - another indication that Rife used helium in his early tubes, and may have switched to argon as the preferred noble gas to use in the plasma lamps.

Other writings tell of the tubes having to be sent back to Hoyland to be "recharged" or refilled with whichever noble gas was being used - we have seen both helium and argon noted in the letters. In June of 1937, Johnson writes that after eight months of operation, he closed his Pasadena Clinic, which worked primarily on cataracts in the elderly. In cooperation with an oculist, it was determined that in every case except one, the patient's cataracts either cleared up, or his or her vision improved to the point no further treatments were needed. It is noted that in 1937, Philip Hoyland was living in the San Diego area, and working with Royal Rife on Ray Machines. A letter from Johnson in late 1937 to Rife indicates some form of misunderstanding between the two men, and Johnson's correspondence to Rife lessens from that date.

Letters from Western Electronic Corporation in 1938 indicate that Rife was building a flat field lens telescope, possibly work he continued into the 50's. A letter to the Royal Microscopical Society (apparently a part of the British Medical Society) in 1939 nominated Rife for a Fellowship in that Society.

In 1938, Dr. Bertram Gonin wrote from England expressing concern that the two machines he received were not functioning, and John Crane, years later, notes that he thought one of the Beam Ray employees may have sent unfinished machines to England so he would be asked to

## Lyme Combat VII – GB4000 Frequency Generator

---

go repair them. Newer information hints that one of the people in England may have tinkered with the machine, and one of Rife's employees, Henry Siner, traveled to England in 1939 to adjust the microscope and to work on the Ray machine which had been sent. Siner later reported that the Ray Machine was working correctly. He returned (along with the #4 microscope) to the US in 1939. Rife had been planning on going, but the lawsuit (following) prevented that trip. The #5 microscope, a greatly simplified version of the Universal #3 microscope, was later sent to England, and is currently in the Science Museum in London, England, but is normally not on display.

On April 24 of 1938, Royal Rife and Philip Hoyland, as the owners of the Rife Ray instrument, granted C. R. Hutchinson a 1/3 interest in the machine for the purposes of "all other business requirements necessary for the expedient and beneficial promotion of such Rife Ray machine." In 1939 court documents, the statement is made that the Rife Ray invention was owned by Royal Raymond Rife, Philip Hoyland, and C.R. Hutchinson.

It is likely that the assertions that the Rife Ray machine was built by Philip Hoyland is accurate - indeed, in the videotapes (from the original film) of the Rife Laboratory, there is no electronics shop shown, although many other rooms in the lab are displayed. It is likely that the machines were manufactured in the Pasadena area by Hoyland, and transported to Rife's lab.

By May of 1939, Hoyland had filed suit against the Beam Ray Corporation, claiming that the firm was promoting the manufacture and development of the machine in England, and thus reducing or eliminating royalty payments made to Hoyland, one of the owners of the machine, and charging that the above-mentioned stock transfers were illegal. One of Hoyland's attorneys, Arron Sapiro, had been instrumental in the founding of the farmer's Co-Op movement in the US and Canada during the 1920's. It is worthy of note that Sapiro, brought by Hoyland, attended

## Lyme Combat VII – GB4000 Frequency Generator

---

meetings of the Beam Ray Board of Directors as a "friend of the company", yet is the attorney, along with Eli Levenson, who Hoyland used in suing the corporation. Attorney Levenson's name appears constantly in the court documents - Sapiro is rarely noted.

The lawsuit was closed on December 6th of 1939 by San Diego Superior Court Judge Edward Kelly, finding for the defendants, and Hoyland was ordered to pay the costs and disbursements of the court case. No record has been found as to whether any costs were ever recovered - the indications are that the corporation was by this time bankrupt. It is possible that Hoyland, who had asked in his suit that his attorney's fees be paid by the defendants, may have also been bankrupted when his complaint was ruled against, however in 1940, he is again shown at the Stonehurst Drive address. By 1943, Hoyland is shown at a different address, and by 1944 had moved out of the Pasadena area. Reports are that he never again worked in the electronics field.

By late 1940, Rife had been named a Fellow (or possibly a Royal Fellow) of the Andean Anthropological Expedition, an Institute for Scientific Research based in Phoenix, Arizona. The society's Advisory Board looks like a Who's Who of the Southwestern US's medical and business community of the 1940 era.

Dr. Raymond Seidel, in June of 1942, wrote to Rife with questions about the Universal Microscope for the article Seidel was preparing for the Franklin Institute (and later the Smithsonian). At least one of those articles is available from <http://www.rife.org>

Dr. Milbank Johnson, who was known to have had a heart condition, became ill on Saturday, September 30th, and died Monday night or Tuesday morning October 3, 1944 in the Huntington Memorial Hospital (which once was the Pasadena Hospital). It has been said that he

## Lyme Combat VII – GB4000 Frequency Generator

---

was preparing a press release on the successes which had been accomplished by the Rife device - I have found no indications of such actions, and in any case, it was certainly not Johnson's style to become involved years later in an enterprise from before. I feel it extremely unlikely that any such press release existed or was ever planned, since the local newspapers would have reported on that.

Through the 1940's and early 50's little is heard concerning either Royal Rife or the Beam Ray Corporation, which probably closed as an active concern following the 1939 lawsuit. In 1950, Rife hired John Crane as a machinist, and Crane later became the President of the manufacturing effort, and also, in 1950, started doing business as Allied Industries.

A report written by Rife in 1953 states that "This BX virus can be readily changed into different forms of its life cycle by the media upon which it is grown." That statement, indicating the pleo-morphism of the organism (changing to different forms), possibly causing different diseases depending in what stage of its development the organism is in, was also directly opposed to the established medical theories of the day.

Rife invested years of research in determining observable facts the medical establishment had no interest in hearing and even less in researching for themselves. Even had Rife been an M.D., the strong wills of those in power in the medical establishment controlled permissible treatment, funding, and even what could get published in medical journals.

Indeed, not much has changed, as the establishment has also managed to get laws passed controlling even what an MD may say to a patient, let alone offering treatments which may not conform to the established protocols of treatment. Health Care is not about treatment, it's about

## Lyme Combat VII – GB4000 Frequency Generator

---

doing that treatment in a manner the establishment permits - the health of the patient is, unfortunately, a minor concern.

Sept 1954, Rife gives rights to a "Measuring Telescope" to Rohr Aircraft Corporation, after working there as a consultant since late in 1953. In the late 1950's, there are a number of documents from several people at The Church of Jesus Christ of Latter-day Saints (Salt Lake City) and John Crane and John Marsh, who was working with Crane.

Apparently there were one or more Rife machines in the Salt Lake City area being used experimentally. Rife's name comes up as one would refer to an advisor or consultant, so apparently by this time Rife had little to do with the ray tube technology or the company he once authorized to be founded.

Also in 1954 is an application for a research grant by Allied Industries of San Diego, where Rife is listed as Principal Investigator for the grant, and is shown as Director of Research. John Crane is listed as the Manager and Design Engineer, Verne Thompson the Chief Electronic Engineer, Don Tully is the Development Associate, and Cameron Bland is the Electronic Engineer. Dr. James B. Couche, MD, is shown as a consultant. Dr. Couche had been involved with Rife for many years.

In 1956, letters from John Crane started used the name Life Labs, Inc. (also Rife Virus Microscope Institute) during that period, apparently in an attempt to protect the company from the ongoing (and successful) attempts by the medical establishment to silence the technology.

By 1958, John Crane was producing a machine which did not use the plasma tube, and it is reported that a man in Utah "treated himself" and was in remission from prostate cancer as a result. In the late 1950's, Crane made a number of tape recordings, many including Royal Rife,

## Lyme Combat VII – GB4000 Frequency Generator

---

about the machines, Rife's experiences, and the possibility of setting up business with a person back east to start manufacturing Crane's version of the Rife machine.

It is possible that a few of the Ray Tube devices still existed at that time, indeed there was an MD in the Midwest who had one, and had reported using it with great success. Rife states on one of the tapes that he could take e.coli, a common life form in everybody's intestinal tract, and with the proper pH levels, turn it into a cancer organism.

In 1967, Rife wrote in a letter to the Ninth Circuit Court of Appeals (in support of an appeal by John Crane, file #21542) that he had been "supported by Harry Bridges and H.H. Timken and Milbank Johnson with unlimited help and influence." This is one of the few references Rife ever made of his supporters.

Little is known of his Rife's career during the period from the mid-50's until his death on August 5th, 1971, except that the various trials and medical witch-hunts took a terrible toll on his health.

He fled to Mexico to avoid the 1939 lawsuit, and there is an indication that there was an additional lawsuit in the 1950's in which John Crane and John Marsh were the defendants, and were sent to prison. I have no records of that suit. Sometime after that, Rife became involved in the Bahi faith in the San Diego area, and also married his second wife.

Rife unquestionably was a genius, and like many before, died a pauper. He was interred at the Mount Hope Cemetery in San Diego, alongside his wife Mamie Quinn, whose family were prominent in San Diego Chinese history.

## Appendix G – How to Relieve the Symptoms of Lyme Disease.

Due to prolonged periods of inactivity due to profound fatigue, weight gain is a common problem that further erodes your self-esteem.

### Weight Gain/Loss with Lyme Disease

Depending on our immune system, genetics, co-infections, eating habits, many of us gain weight and many others lose weight.

Dr. Burrascano insists on a very strict high protein diet with no sweets or starches. For many the adherence to this diet will keep weight at a healthy level. However, if our body is acidic, fat will be stored up around important organs to protect the organs from the destructive acid. This is why pH Balance is so important. For more information ([read free ebook called Five Element Shake.](#))

There are some very frightening pills on the market which promise weight loss, and these short cuts can be very tempting. Our self-esteem is at an all-time low, and extra fat just adds to depression. Not enough weight has the same depressing and physical dangers.

The best product that I can recommend and use myself is [Apple Poly](#). It actually reduces belly fat. But additionally, apple polyphenols do the following:

- cardiovascular diseases

## Lyme Combat VII – GB4000 Frequency Generator

---

- cancers
- osteoporosis
- neurodegenerative disease
- diabetes

Polyphenols have also been known to remove oxygen radicals in the body, a substance that may cause cancer and accelerate the process of aging.

But for the first time during a study of apple polyphenols in Japan, there was a significant effect on muscle strength and organ fat. They have also been found to boost the immune system and measurably extend life span!

[Apple polyphenols](#) are made with immature green apples (which are 10 times more potent than mature fruit), exclusively from the peels (the richest source of phytonutrients).

[Apple polyphenols](#) are 18 times more potent than Vitamin C, and in addition to the super-modulation of oxidative stress, they appear to play a role in the prevention of degenerative diseases, particularly cardiovascular diseases and cancer.

Best of all, apple polyphenols are water soluble, where most other polyphenols are not. This allows for the nutrients to be absorbed quickly and easily.

### DISCLAIMER

*Don't proceed with any treatment protocol without the full support of your Lyme disease specialist and/or your primary care physician. If you don't have one, please find one as soon as possible.*

*It is vitally important that you find and work with a Lyme disease specialist who can:*

- *Try different treatment protocols, and monitor which works best;*
- *Support you through potentially severe Herxheimer reactions (that means your treatment is working);*
- *Manage various symptoms that persist during treatment;*
- *Evaluate whether parasites or co-infections are complicating your disease;*
- *Help you keep your sanity with emotional comfort and support;*
- *Present the most promising of emerging treatment protocols;*
- *Monitor and protect the healthy function of your primary organs through recovery;*
- *Provide appropriate diet, exercise and supplements for total recovery.*
